

Fund Description

The Fiducian Capital Stable Fund is suitable for investors seeking a relatively high level of income supplemented by a modest level of capital growth. The bulk of the portfolio is held in the fixed interest and cash sector to reduce the likelihood and frequency of negative returns over a single year period. However, some exposure to shares for long-term performance is also included.

This Fund is likely to be suitable for investors who can hold investments for two to three years at least, who are relatively conservative, but are prepared to take some risk by investing a small portion of their assets in Australian and international share funds and property.

Manager Commentary

The Fund out-performed the median manager by 0.2% with a return of 0.9% during April. Over the rolling year to end-April, the Fund out-performed the median manager by 1.3% with a return of 4.3%. During the month, cash and bonds significantly under-performed domestic equities, global equities and domestic listed properties. Domestic equities and property securities rose solidly in April and out-performed international equities in local currency terms. The Fund's overweight exposure to both global and domestic shares added to fund performance. A 1.9% fall in the Australian Dollar against the US Dollar added to fund performance in local currency terms. Out-performance by the Fiducian Australian Shares Fund also contributed to fund performance on a relative basis. Underweight exposure to defensive assets also contributed to fund performance as fixed interest sectors were negative, with the Australian 10-year Government bond yield rising by around 0.17% during the month. Energy, base metals and bulk commodities prices were broadly higher during the month, which boosted the resources sector.

An overweight exposure to international and domestic equities remains, as currently valuations for equities still appear to be more attractive than for Australian and international bonds, despite a recent fall in the bond markets. This fund was ranked 10th out of 113 multi-sector diversified conservative funds surveyed by Morningstar for the rolling year, while it ranked 5th out of 104 funds over the 5 years to end-April.
