

The benefit of the Fiducian 'Manage the Manager' investment process is that it does not rely on the expertise of one manager or one team alone. Instead, some of the best managers from Australia and around the world are brought together in one fund to manage your money. In the Fiducian Ultra Growth Fund, thirteen specialist managers each manage a portion of your portfolio.

The Fiducian Ultra Growth Fund is a fund for the future. It provides a blend of investments that are typically not available in a single fund elsewhere. The fund offers you exposure to assets which we expect will be able to provide you with a relatively higher rate of growth over the longer-term. They include:

- **Australian smaller company shares**
- **Emerging markets shares**
- **International smaller company shares**
- **International technology securities**
- **Listed property securities**

These asset classes are blended together and tactically re-weighted by Fiducian's experienced investment team.

FIDUCIAN ULTRA GROWTH FUND

1st*

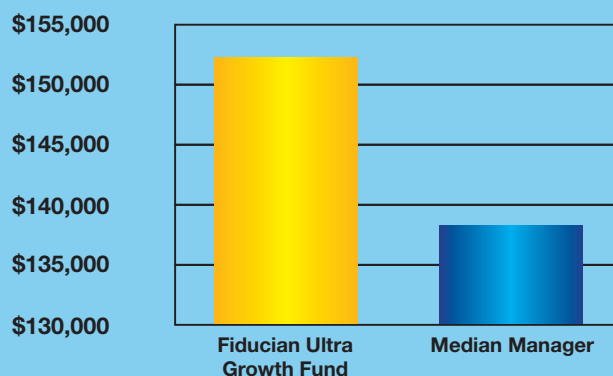

out of 98 funds
over 1 year

2nd*

out of 80 funds
over 4 years

The Fiducian Ultra Growth Fund returned 11.1% per annum over the four years to end December 2012. This compares favourably with the median manager of the Morningstar 'Multisector Aggressive' category, which returned 8.4% per annum over the same period. To put this into perspective, the Australian Share Market (as measured by the S&P ASX 200 Accumulation Index) returned 10.6% per annum over the same period.

\$100,000 invested over 4 years
to end-December 2012

* According to surveys carried out by Morningstar for similar funds over the period ended - December 2012
